

INTERNSHIP OFFER LETTER

Offer ID: TC-DF-INT-202626

Date of Issue: 25 Aug 2026

Subject: Offer of Internship – Digital Forensics Intern

Dear **CHANDANI KUMARI**,

We are pleased to offer you the position of **Digital Forensics Intern – Cyber Investigation & Digital Forensics at TriosCyber**, under our structured Task-Based Cybersecurity Internship Program, in partnership with **Ernith**.

Based on your selected area of interest, you have been selected for the **Digital Forensics Internship Track**, where you will receive practical, industry-oriented exposure through weekly live sessions, guided tasks, and hands-on security monitoring activities.

INTERNSHIP DETAILS

Particular	Details
Organization	TriosCyber
Learning Platform Partner	Ernith
Role	Digital Forensics Intern
Duration	01 September 2026 – 01 October 2026
Mode	Virtual
Program Type	Task-Based Learning Internship
Program Fee	Free of Cost
Learning Format	Weekly Live Sessions + Practical Tasks

ROLE & KEY RESPONSIBILITIES

As a **Digital Forensics Intern**, you will participate in structured Digital Forensics activities and practical assignments under the guidance of program mentors. Your key responsibilities will include:

- Understanding fundamental digital forensics principles, methodologies, and investigation processes.
- Learning proper digital evidence identification, preservation, acquisition, and documentation practices.
- Performing assigned forensic analysis within authorized lab and investigation environments.

- Analyzing relevant files, file systems, system artifacts, logs, and other digital evidence as part of assigned exercises.
- Completing weekly practical tasks and submitting assigned deliverables within deadlines.
- Maintaining confidentiality, professional conduct, and responsible handling of digital evidence.

LEARNING EXPOSURE

Throughout the internship, you will gain practical exposure to:

Evidence Identification → Preservation → Acquisition → Forensic Analysis → Artifact Examination → Timeline Analysis → Findings → Reporting

The learning activities may cover Digital Evidence, Disk Forensics, File-System Analysis, OS Artifacts, Memory Forensics Fundamentals, Log Analysis, Cyber Investigation, Forensic Tools, and Investigation Reporting, based on the assigned tasks.

COMPLETION & CERTIFICATION

Successful completion will be evaluated based on:

Attendance + Participation + Task Completion + Assignment Quality + Professional Conduct

Participants who fulfill the applicable internship requirements will be eligible to receive a **Digital Forensics Internship Certificate** issued by TriosCyber.

IMPORTANT TERMS

This is a **free, non-paid learning and skill-development internship** intended to provide practical industry exposure. It does not constitute employment, and no salary or stipend is payable under this program.

All forensic analysis and investigation activities must be performed **only on authorized evidence, datasets, systems, or laboratory environments provided for the internship**. Unauthorized access, collection, alteration, extraction, or analysis of third-party data or systems is strictly prohibited.

Participants must maintain the confidentiality and integrity of all digital evidence and information provided during the internship.

This internship does not constitute a guarantee of employment or placement. Any future employment opportunity will be subject to a separate recruitment and selection process.

We are pleased to welcome you as a **Digital Forensics Intern at TriosCyber** and look forward to your commitment, professionalism, and active participation throughout the internship.

CONGRATULATIONS ON YOUR SELECTION.
